Facility

About Sefi Fabricators

Sefi Fabricators manufactures high quality stainless steel equipment for a variety of industries, including Labs, Commercial & Residential Kitchens, Architectural, Catalog and OEM Customers, for over 60 years.

// OUR MISSION.

Our mission is to provide you with an innovative style of stainless steel fabrication, delivered by a staff of dedicated individuals, that addresses your requirements in an ever-growing, evolving industry. We do this by developing a unique workflow that combines the latest laser cutting technology, CAD/CAM bending, CAD design and current TIG/MIG welding and polishing.

Sefi Fabricators is committed to providing the best possible product quality and performance, reliable functionality, and top-notch appearance. We are eager to work on your projects and together we will exceed your goals. We strive to obtain complete customer satisfaction. It is our goal to provide you with the best service that caters to your budget. We will work with you to meet your needs of today and to reach your goals for the future.

// OUR EXPERIENCE.

Our craftsmanship starts first with the skilled men in the factory. For the men, working with stainless steel is an art that takes many years to develop. The men take great pride in their craft and are not satisfied until they have reached perfection.

We buy the best material, type 304 stainless steel which has high corrosion resistance and uniformity of finish. Production begins with CNC machine work and final product is finished with a non-directional brushed satin. The finish has the ability to hide and blend scratches for many years. Each product is then carefully inspected and protected for delivery to our customer.

// OUR TEAM.

Sefi Fabricators is a people first company. We strive to create a unique, engaging work environment that fosters the kind of loyalty and long term commitment that makes for satisfied customers and suppliers. Our talented team is made up of people who epitomize this aspiration.

About Commercial Projects

Sefi Fabricators has a long and successful history with Institutional, Public, and Commercial Projects. Our knowledgeable engineers understand that your project needs to move forward and that you expect results.

We stand behind the quality of our products and our custom manufacturing capabilities. This means you have more options for designs and solutions. Sefi Fabricators is more than just a stainless steel fabricator. We are your teammate.

Sefi Fabricators provides prompt and accurate answers to all inquiries and concerns, and will offer suggestions to help you make the most out of your commercial project.

We understand that whatever the specification, the finished product is a reflection of your needs and aspirations. With that in mind, we always aim to deliver your project, on time and on budget.

From start to finish, if your commercial project demands the long-lasting quality of American-made stainless steel equipment, we are ready to work with you.
