

Residential Projects

Enhance Your Home Decor

About Sefi Fabricators

Sefi Fabricators manufactures high quality stainless steel equipment for a variety of industries, including Labs, Commercial & Residential Kitchens, Architectural, Catalog and OEM Customers, for over 60 years.

// OUR MISSION.

Our mission is to provide you with an innovative style of stainless steel fabrication, delivered by a staff of dedicated individuals, that addresses your requirements in an ever-growing, evolving industry. We do this by developing a unique workflow that combines the latest laser cutting technology, CAD/CAM bending, CAD design and current TIG/MIG welding and polishing.

Sefi Fabricators is committed to providing the best possible product quality and performance, reliable functionality, and top-notch appearance. We are eager to work on your projects and together we will exceed your goals. We strive to obtain complete customer satisfaction. It is our goal to provide you with the best service that caters to your budget. We will work with you to meet your needs of today and to reach your goals for the future.

// OUR EXPERIENCE.

Our craftsmanship starts first with the skilled men in the factory. For the men, working with stainless steel is an art that takes many years to develop. The men take great pride in their craft and are not satisfied until they have reached perfection.

We buy the best material, type 304 stainless steel which has high corrosion resistance and uniformity of finish. Production begins with CNC machine work and final product is finished with a non-directional brushed satin. The finish has the ability to hide and blend scratches for many years. Each product is then carefully inspected and protected for delivery to our customer.

// OUR TEAM.

Sefi Fabricators is a people first company. We strive to create a unique, engaging work environment that fosters the kind of loyalty and long term commitment that makes for satisfied customers and suppliers. Our talented team is made up of people who epitomize this aspiration.

About Residential Projects

Sefi Fabricators understands that residential projects are not a one-size-fits-all standard. Each one is, and should be, distinct. This is why we take pride in custom designing your project to meet your needs and decor to enhance your home.

Whether you are looking to improve your kitchen area, bar area or even your laundry room area, we turn your design dreams into reality with handcrafted pieces. Our stainless steel creations are guaranteed to reflect the color of the room and the light will bring out its natural beauty.

Furthermore, stainless steel is easy to clean/maintain and finished with an elegant brushed satin so there is no need to worry about fingerprints and scratching.

All creations are built to order. Our knowledgeable customer service staff will be happy to discuss your requirements, answer any inquiries, and offer solutions. Whether you have exact specifications or if you are looking for options, we will work with you to provide high quality American-made stainless steel solutions.

Our Portfolio

Sefi Fabricators is highly experienced in the following residential applications:
